Dear Karen,

Between our two companies a possible catastrophe was circumvented. A temporary rental transformer was going to be energized on Friday at a major refinery. We were consulted last minute to give a professional opinion whether or not it was safe to energize. The technician found abnormal readings and ACTI confirmed our results.

When a set of circumstances requires extra effort, time and time again ACTI has supported our efforts. You personally helped me on several such projects in the past.

I want to thank you and your staff for a job well done.

Sincerely,
